

A heatmap visualization showing the importance of 1000 features for 1000 different models. The color scale ranges from dark blue (low importance) to red (high importance). The diagonal elements are red, indicating that each model is most important for its own feature set. The off-diagonal elements show varying degrees of importance, with some features being highly important for multiple models (e.g., feature 1000 is highly important for models 1000 and 900).
