

A heatmap visualization showing the importance of 1000 features across 1000 models. The x-axis and y-axis both represent the 1000 most important features. The color scale ranges from dark blue (low importance) to yellow (high importance). The diagonal elements are bright yellow, indicating that each feature is highly important to its corresponding model. There are also several off-diagonal yellow and orange squares, suggesting some degree of feature importance overlap between different models.
