

A heatmap visualization showing the importance of 1000 features across 1000 features. The x-axis and y-axis both represent the 1000 most important features. The color scale ranges from dark blue (low importance) to yellow (high importance). The diagonal elements are bright yellow, indicating high self-importance. There are several off-diagonal yellow and orange squares, suggesting some features are highly correlated or important in combination. The rest of the matrix is predominantly dark blue, indicating low importance for most feature pairs.
