

A heatmap visualization showing the importance of 1000 features for 1000 different models. The x-axis and y-axis both represent the 1000 most important features. The color scale ranges from dark blue (low importance) to yellow (high importance). The diagonal elements are bright yellow, indicating that each feature is highly important for its corresponding model. There are also several off-diagonal elements that are bright yellow, indicating that certain features are highly important for multiple models. The overall pattern shows a dense structure of high importance for many features across many models.
