

A heatmap visualization showing the importance of 1000 features for 1000 different models. The x-axis and y-axis both represent the 1000 most important features. The color scale ranges from dark blue (low importance) to yellow (high importance). The diagonal elements are bright yellow, indicating that each feature is highly important for its corresponding model. The off-diagonal elements show varying degrees of importance, with some features being more important for certain models than others.
